

Wealth Building with Weeklys: Weekly Wealth Trade Strategy (WW)

WW works with basic trend-line and support/resistant breakouts and breakdowns as seen on a combination of charts. A 30-minute chart set up is an alert for an entry on an equity's 60-minute chart. In a stronger trend trading atmosphere, an alert on a 60-minute chart sets up an entry on a 120-minute chart.

This is an active trade strategy. Depending on market atmosphere, it can have 5-7 trades a week. The strategy trades weekly option expirations that are held between 2 days to a week or so. (Average trade is held 6 days)

In addition to the manual that subscribers receive, they have access to a weekly newsletter (Wednesday) that lists potential trade candidates that are beginning to form tradeable patterns. This gives subscribers the opportunity for even more trade opportunities.

The recommended minimum account size is \$10,000 and trade allocation \$500.

Total Trades	340	
Winning Trades	198	58.24%
Losing Trades	142	41.76%
Total Profit	\$30,652.00	
Winning Trades	\$71,428.60	
Losing Trades	\$(40,776.60)	

These trades are based on an account size of \$10,000.
Each trade is based on an investment of approximately \$500.
The average days per trade is 6 days.
The total profit from 10/17/11 through 08/5/2016 has been a gain of 322%

The average profit per trade is \$129.66
The average profit per winning trade is \$396.28
The average loss per losing trade is \$355.09
